

Oklahoma Comprehensive Water Plan

As the Oklahoma Comprehensive Water Plan (OCWP) local meetings occur, you should be aware of the opportunity to have input at the meeting in your area. The method that Oklahoma Cotton Council is suggesting is to prepare a written statement to be offered along with an oral presentation of your statement at the meeting. Local meetings will determine who will be invited to Regional meetings then Planning Workshops. The method that is being used needs your input from the beginning.

Please speak to the importance to agriculture and the future utilization of this resource. Think forward technology, outside the box, and the impact that increased agricultural use could have. Stewardship should be emphasized also.

Your attention to and participation in this process is important to the formulation and implementation of the OCWP.

Thank you for your attention to this critical issue that will influence the future of this great state and agriculture.

Harvey Schroeder

OCWP Local Input Meetings

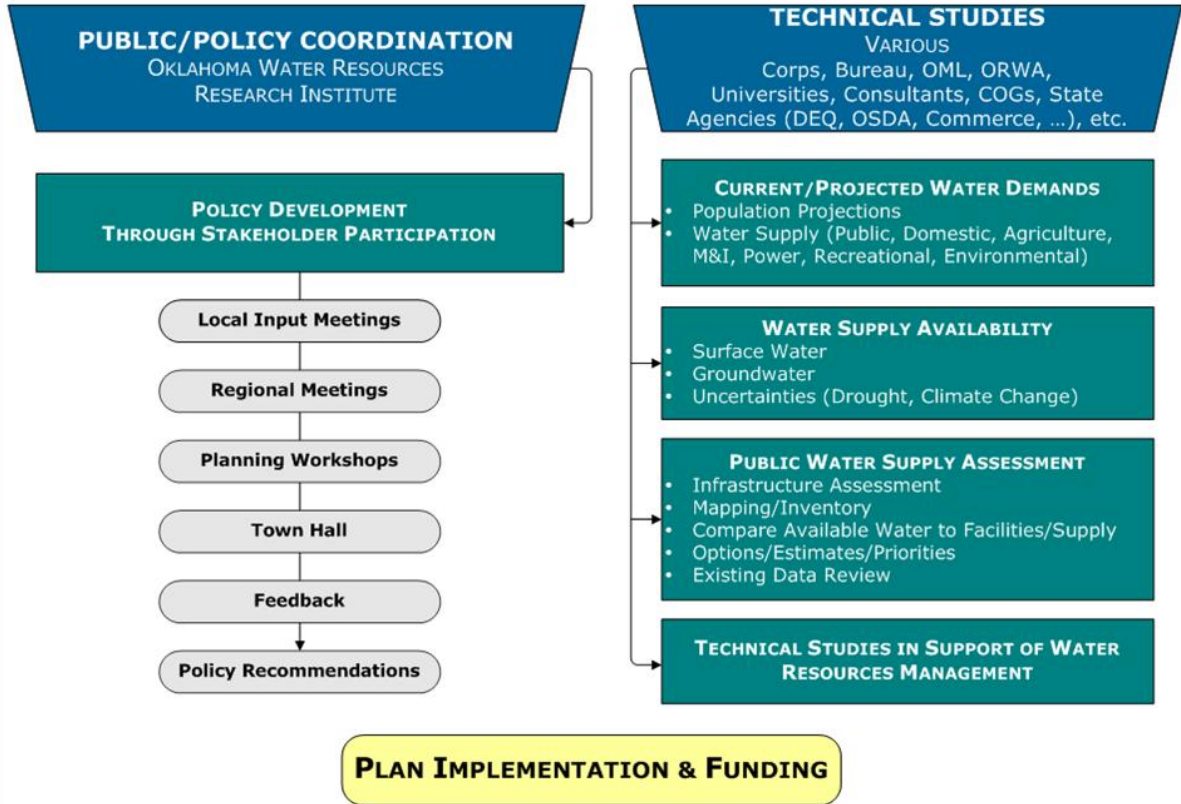

OCWP Local Input Meeting
